## The origins of Longines watchmaking know-how

Located in Saint-Imier since 1832, Longines has established close links with the village that has seen the foundation and development of the firm. As the only watchmaking company that was set up and still remains in Saint-Imier, Longines has stayed true to its historical values: tradition, elegance and sport. Today, with The Longines Saint-Imier Collection, the brand is launching a series of exceptional timepieces fitted with mechanical movements that has sprung from the fertile area that constitutes the watchmaking heritage of its home territory.
